

Phoenix Inverters

Phoenix Inverte

Phoenix Inverter 12/800 with Schuko socket

12/180

180VA – 1200 VA 230V/50Hz and 110V/60Hz

SinusMax - Superior engineering

Developed for professional duty, the Phoenix range of inverters is suitable for the widest range of applications. The design criteria have been to produce a true sine wave inverter with optimized efficiency but without compromise in performance. Employing hybrid HF technology, the result is a top quality product with compact dimensions, light in weight and capable of supplying power, problem-free, to any load.

Extra start-up power

A unique feature of the SinusMax technology is very high start-up power. Conventional high frequency technology does not offer such extreme performance. Phoenix inverters, however, are well suited to power up difficult loads such as computers and low power electric tools.

To transfer the load to another AC source: the automatic transfer switch

For our lower power models we recommend the use of our Filax Automatic Transfer Switch. The Filax features a very short switchover time (less than 20 miliseconds) so that computers and other electronic equipment will continue to operate without disruption.

LED diagnosis

Please see manual for a description.

Remote on/off switch

Connector for remote on off switch available on all models.

Remote control panel (750VA model only)

Connects to the inverter with a RJ12 UTP cable (length 3 meter, included).

DIP switch for 50/60Hz selection (750VA model only)

DIP switches for Power Saving Mode (750VA model only)

When operating in Power Saving Mode, the no-load current is reduced to 1/3 of nominal. In this mode the inverter is switched off in case of no load or very low load, and switches on every two seconds for a short period. If the output current exceeds a set level. The inverter will continue to operate. If not, the inverter will shut down again. The on/off level can be set from 15W to 85W with DIP switches.

Available with different output sockets

Please see pictures below.

Phoenix Inverter 12/350 with IEC-320 sockets

Phoenix Inverter 12/180 with Schuko socket

Phoenix Inverter 12/180 with Nema 5-15R sockets

Phoenix Inverter 12/800 with IEC-320 socket

Phoenix Inverter 12/800 with Schuko socket

Phoenix Inverter 12/800 with BS 1363 socket

Phoenix Inverter 12/800 with AN/NZS 3112 socket

Phoenix Inverter 12/800 with Nema 5-15R socket

1) Battery cables of 1.5 meter (12/180 with cigarette plug) 2) Protection key: a) output short circuit b) overload c) battery voltage too high d) battery voltage too low	3) Non linear load, crest factor 3:1 4) Frequency can be set by DIP switch (48V/750VA model only)					

Battery Alarm

An excessively high or low battery voltage is indicated by an audible and visual alarm, and a relay for remote

Remote Control Panel

(48V/750VA model only) RJ12 UTP cable to connect to the inverter is included (length: 3 meter).

BMV Battery Monitor

The BMV Battery Monitor features an advanced microprocessor control system combined with high resolution measuring systems for battery voltage and charge/discharge current. Besides this, the software includes complex calculation algorithms to exactly determine the state of charge of the battery. The BMV selectively displays battery voltage, current, consumed Ah or time to go. The monitor also stores a host of data regarding performance and use of the battery. regarding performance and use of the battery.
